Joe,

Thanks for coming down last Thursday to discuss the pending revision to the permit for the west pond expansion. Do you have an estimated time when you will be submitting that? I think we stated in the meeting that the bond is due for routine periodic escalation this month, but we were considering holding off until this revision comes in. However, if the proposed revision is still going to be some time off, we think we will need to adjust the bond to current dollars and include the cost estimate for the revision to reclaim the east dikes that was submitted this January. Therefore, it would be helpful if we had some idea when this new revision will be submitted.

When submitting this revision, we also believe that this would be a good time to completely update the entire NOI. This would include rolling past amendments and revisions into the Operations Plan, updating the maps and facilities plan, providing an updated tabulation of disturbed areas, etc. After a time, an NOI with a long series of amendments and revisions becomes difficult to track and manage. Repackaging the amendments and revisions into an updated, current NOI makes it easier for everyone to make sense of it.

Let me know if you have any questions. Thanks again for meeting with us to discuss your future plans.

Mike,

My best estimate is that the plan for the South Clyman Bay pond expansion will be submitted in August - September. To that end, we would prefer to have the bond adjusted now for the revised reclamation plan for east-side ponds, adjusted quarry impacts, and routine financial adjustment.

Best Regards

Joe

Joe,

We can do that. I'll set up a task to get this taken care of.

With the information you provided on Strong's Knob and Little Mountain, along with the dike reclamation estimates, I think we have enough to go on. If I need any further information, I'll let you know.

Will you be at the June 10th Great Salt Lake Tech Team meeting?

Thanks,
